

# PROTEIN PLUS

**With Chromium Chelavite--U.S. Patent #5,614,553**

## **NEW, DOUBLE-STRENGTH FORMULA**

Protein Plus is possibly the world's most powerful super-protein formulation. It contains not one but two high-assimilation, nondairy forms of protein along with the most powerful form of Chromium in existence. (Chromium Chelavite; U.S. Patent #5,614,553). Along with other supercharging compounds such as L-Lysine, Omega-3 Fatty Acids and a special complex of all 84 Minerals and Trace Minerals from an ocean source, this unique formulation is ideal for weight loss, bodybuilding muscle development as well as blood sugar normalization.

**Ingredients:** Soy Protein Isolate; L-Lysine Amino Acid Complex; Ocean Sourced Peptide/Amino Acid Complex; Ocean Mineral/Trace Mineral Complex; Chromium Chelavite (U.S. Patent #5,614,553.)

**Soy Protein Isolate:** Ultra-powerful source of protein from the soybean. Not only a source of protein, the soy also helps lower bad cholesterol, raise good cholesterol, lower triglycerides and modulate the hormonal system.

**Ocean Source Peptide/Amino Acid Complex:** These forms of virgin proteins require no digestion and are instantly assimilated by the body to help the body burn more fat and create new, lean muscle tissue.

**L-Lysine Amino Acid Complex:** One of the "essential" amino acids the body requires for protein synthesis. The body cannot manufacture Lysine, so it must be supplied to the body's mechanisms. It is a basic, building block of protein and thus muscle development. It also assists in proper overall growth in the body and bone development.

**Flax Seed Oil Powder:** Concentrated source of essential Omega-3, 6 and 9 fatty acids. These help control cholesterol and lipid levels as well as lubricating muscles and tissue for peak health and anti-aging action.

**Chromium Chelavite (U.S. Patent #5,614,553):** The "miracle mineral" that controls the pancreas and thus, insulin production and regulation. Needed for control of blood sugar levels. Helps to lean body mass and create lean body tissue and assist in weight loss. This form of Chromium received a patent for its superior assimilative capacities within the body. Chromium is notoriously difficult for the body to assimilate. Chromium Chelavite demonstrated an ability to supply twice the amount of essential Chromium to the body than any other currently available.
